## OUR PHILOSOPHY ON CREATING SUCCESSFUL TEAMS

We have always and will continue to coach athletes to the best of their ability independent of the level of team they are on while striving to build the most successful teams. In our sport, scores are essentially based on two elements: the “Difficulty” that is incorporated within the routine and the “Technique”- how well in which the team executes the skills.

The difficulty of each skill (stunting/tumbling) is labeled as: LEVEL APPROPRIATE (the most basic), ADVANCED (intermediate) or ELITE (the hardest skills you can perform within that specific level). We strive to build our teams so that athletes are chosen who can compete ELITE level skills with exceptional execution.

### ELITE CHEER FUNDAMENTALS

- ★ An understanding of Elite Cheer program, expectations, and standards of skill execution
- ★ Knowledge of the Score Sheet Rubric & USASF Safety/Skill Levels
- ★ All Star Cheer Terminology: tumbling/stunts (bridge up, bounder, whip/half up, double down, basket tosses)
- ★ Understanding Standard Execution and Proper Progression of Tumbling skills building upon solid basics
- ★ Understanding Standard Execution and Proper Progression of Building Skills hand/body movements, grips, control of flyer, flyer body positions
- ★ Understanding & Execution of Tumbling Skills: building upon solid basics
- ★ How to compete: mental toughness, how to successfully fail, control anxiety, enjoy the competitiveness

### CONSIDERATION WHEN BUILDING TEAMS:

- ★ Age grid (maximizing age limit)
- ★ “Execution of skills” - skills that can be performed on blue without hesitation and under aerobic stress
- ★ Tumbling, Stunt Ability
- ★ Variability of Athlete (can the athlete fly and base, primary and secondary)
- ★ Jumps (height, toe point, arm placement)
- ★ Performability/Maturity
- ★ Experience within the stunt position & years spent at a particular level
- ★ A large portion of team placements will rely on athlete evaluation from previous seasons (coachability, work ethic, attitude, attendance, skill retention)
